DETAILED ACTION

Restriction / election

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11, drawn to a method for extending a primer or a pair of primers, classified in class 435, subclass 6.

II. Claims 12-17, drawn to a dry or liquid ready-to-use mixture comprising a thermostable DNA polymerase, 514, subclass 2.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions in Group II and Group I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product can be used in a materially different processes such as DNA repair processes.

Group I is independent and distinct from Group II because the method steps of Group I are not needed to practice the invention in Group II. Further the invention in Group II can be obtained or purified from naturally occurring biological sources.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1637

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
